**JOMO KENYATTA UNIVERSITY
OF
AGRICULTURE AND TECHNOLOGY**

CURRICULUM DEVELOPMENT AND REVIEW POLICY

2026

University Vision

A University of global excellence in Training, Research, Innovation and Entrepreneurship for Sustainable Development.

University Mission

To offer accessible, quality and transformative training, research, innovation and entrepreneurship in order to produce leaders in the fields of Agriculture, Engineering, Technology, Built Environment, Enterprise Development, Law, and the Social, Health, Pure and Applied Sciences, to suit the needs of a dynamic world.

University Motto

Setting Trends in Higher Education, Research, Innovation and Entrepreneurship

University Core Values

Integrity - Uphold honesty and strong moral principles in all decisions and actions.

Professionalism - Ensure and maintain high standards in the discharge of responsibilities and delivery of services.

Innovativeness - Foster development and/or adaptation of novel and appropriate technologies and practices.

Dynamism - Demonstrate initiative and responsiveness to changing trends in service provision.

Teamwork - Inculcate and practise a participatory approach in the conduct of all activities and operations of the University.

Patriotism – Demonstrate a sense of devotion and personal identification with the University.

University Philosophy

JKUAT values the need for transformational leadership to steer the University towards achieving her vision and mission and contribute towards the social and economic development of the country.

JKUAT shall endeavour to attract, develop, motivate and retain a multi-skilled workforce while nurturing a consultative working environment.

JKUAT shall adopt and utilise ethical standards and best practices in training, research and innovation in order to produce dynamic leaders.

FOREWORD

The Universities Act No. 42 of 2012 (Revised 2024) spells out the objectives of university education as: Advancement of knowledge through teaching, scholarly research and scientific investigation; Promotion of learning in the student body and society generally; Promotion of cultural and social life of society; Support and contribution to the realization of national economic and social development; Promotion of the highest standards in, and quality of, teaching and research; Education, training and retraining higher level professional, technical and management personnel; Dissemination of the outcomes of the research conducted by the university to the general community; Facilitation of life-long learning through provision of adult and continuing education; Fostering of a capacity for independent critical thinking among its students; Promotion of gender balance and equality of opportunity among students and employees; and Promotion of equalization for persons with disabilities, minorities and other marginalized groups.

Through this Policy, JKUAT endeavours to adhere to the Universities Standards and Guidelines 2014 and the Standards, Guidelines, Processes and Procedures for the EAC Regional Programme Accreditation 2021.

This Policy will guide JKUAT to develop relevant curricula for academic programmes, and also provide for continuous improvement. This Policy will go a long way in enabling JKUAT design curricula that enable Kenya to achieve its aspirations and objectives of University Education for national and international development goals.

I take this opportunity to applaud all who contributed to the development of this first edition of the Curriculum Development and Review Policy.

Prof. Victoria Wambui Ngumi, Ph.D, EBS

Vice Chancellor

PREFACE

Universities have three core functions: teaching, research and outreach. Effective teaching consists of imparting a set of skills that can be acquired, improved and extended. In order to ensure effective teaching and learning, there is need to have a well-researched and crafted curriculum. The curriculum must be written professionally taking into consideration a clearly defined and scientifically identified purpose.

This policy is not only aimed at addressing how to meet the Universities Standards and Guidelines on curriculum development and review, but also, to drive the performance objectives of every academic Department. This policy will establish the values, ethics, commitments, and social responsibility of Jomo Kenyatta University of Agriculture and Technology when it comes to matters of training curricula.

This policy identifies the key activities and provides a general strategy to the faculty and stakeholders on how to handle curriculum development and review, and any other curriculum issues as they may arise. This is accomplished by providing limits and alternatives that can be used to guide the decision-making process.

Dr. Christiaan Adika Adenya (PhD),
Director, Directorate of Quality Assurance

ACKNOWLEDGEMENT

We thank the University Management through the leadership of the Vice Chancellor, Prof. Victoria Wambui Ngumi for their support to the Directorate of Quality Assurance and the committee that worked on developing the Curriculum Development and Review Policy.

Special appreciation and gratitude goes to the committee that gathered information and worked on the development of this policy. We acknowledge Prof. Stanley Kamau, Dr. Reuben W. Thuo, Prof. Everisto Opondo, Prof. Jack Mwimali, Dr. Stephen Aming'a, Dr. Michael Kimwele, Dr. Agnes Mindila, Prof. Elijah Ateka, Dr. Lucy Murungi, Prof. Hellen Mberia, Prof. Morris Sakwa, Prof. Eric Okong'o, Ms. Esther Gitau and Ms. Regina Maina.

We recognize the valuable inputs and guidance received from the Deans Committee and the Senate in the development of this policy.

We believe that the faculty will be committed to its implementation and hence maintain and enhance quality standards and market relevance of the University academic programmes.

Dr. Christiaan Adika Adenya (PhD),
Director, Directorate of Quality Assurance

DEFINITIONS

Academic programme - the design of learning content, which is multi-dimensional and includes intentions, structure of content, delivery modes, academic resources and assessment modes; the prescribed syllabus that students must be taught at each key stage;

Assessment - the continuous process of gathering information about a student's learning. This includes a variety of ways to document what the student knows, understands, and can do with their knowledge and skills. The information from assessment is used to make decisions about instructional approaches, teaching materials, and academic support needed to enhance opportunities for the student and to guide future instruction (Department of Education, State of Rhodes Island). Student assessment enables instructors to measure the effectiveness of their teaching by linking student performance to specific learning objectives. It provides feedback to both the students and the instructors about the extent to which the students are successfully meeting the course learning objectives (Michael R. Fisher, Jr and Joe Bandy).

Course unit - a single unit in a programme of study;

Credit Hour - shall be equivalent to a minimum of 13 instructional hours;

Curriculum - a standards-based sequence of planned instructions and experiences where students practice and achieve proficiency in content and applied learning skills. Curriculum is the central guide for all educators as to what is essential for teaching and learning, so that every student has access to rigorous academic experiences. The structure, organization, and considerations in a curriculum are created in order to enhance student learning and facilitate instruction. Curriculum must include the necessary goals, methods, materials and assessments to effectively support instruction and learning.

Department – the basic academic division into which the university is divided for purposes of teaching, examinations and administration of particular academic programme(s);

Formative Assessment - it takes place during the teaching process. Formative assessment occurs through chapter or unit; it improves how students learn; it covers small content areas; it monitors how students are learning; and focuses on process of student learning. It provides ongoing feedback used by instructors to improve their teaching and by students to improve their learning.

Goals - the standards-based benchmarks or expectations for teaching and learning. Most often, goals are made explicit in the form of a scope and sequence of skills to be addressed. Goals must include the breadth and depth to which a student is expected to learn.

Instructional Hour - One instructional hour shall be equivalent to:

- a) One (1) contact hour in a lecture-designed session;
- b) Two (2) contact hours in a tutorial-designed or open-learning-designed session;
- c) Three (3) contact hours in a laboratory-designed or practicum session; and
- d) Five (5) contact hours in a farm or similar practice.

Materials - the tools selected to implement methods and achieve the goals of the curriculum. Materials are intentionally chosen to support a student's learning. Material choices reflect student interest, cultural diversity, world perspectives and addresses all types of diverse learners.

Methods - the instructional decisions, approaches, procedures, and routines that teachers use to engage students in meaningful learning. These choices support the facilitation of learning experiences in order to promote a student's ability to understand and apply content and skills, and acquire the desired attitude. Methods are differentiated to meet students' needs and interests, task demands, and learning environment. Methods are adjusted based on on-going review of student progress towards meeting the goals.

Professional Body - an organisation with individual members practicing a profession or occupation in which the organisation maintains an oversight of the knowledge, skills, conduct and practice of that profession or occupation.

Regulatory Body - a government authority that is responsible for exercising autonomous jurisdiction over some area of human activity in a licensing and regulating capacity. A regulatory body establishes and strengthens standards and safety and ensures consistent compliance with them.

Standard - a reference point against which different aspects of the programme are comparatively evaluated for quality.

Summative Assessment – Is the end-of-unit or term test, final project or standardized test used to assess student understanding on a broad and absolute level. A summative assessment occurs at

end of chapter or unit; it evaluates what students learn; it covers complete content areas; it assigns a grade to students' understanding; it emphasises the product of student learning.

1.0 INTRODUCTION

1.1 Overview

JKUAT is committed to providing high-quality market-driven educational programmes to her students based on rigorous and coherent curriculum. These programmes satisfy the highest ideals of the students' education and well-rounded development while simultaneously meeting the dynamic market needs and fulfilling the objectives of JKUAT's declared vision and mission. This requires that all academic programmes should be continuously monitored, reviewed and updated.

Reviews are intended to ensure that curricula of programmes continue to meet educational needs of students, professional, statutory and regulatory requirements and are consistent with educational goals and aspirations of Kenya. Therefore, this policy establishes a comprehensive University wide process and guidelines of programme development, review and approval.

1.2 Guiding Principles

The guiding principles for Curriculum Development and Review include:

1.2.1 Responsiveness

Programme development and review shall be informed by market needs, technological advancement, professional and regulatory bodies, industry feedback and needs and challenges faced by our students. The curricula shall also respond to the university vision and national education goals.

1.2.2 Consultation and Participation

For the purpose of optimizing the learning outcomes of academic programmes, extensive consultations shall be conducted by the curriculum developers and reviewers. Broad active participation by the key stakeholders yields more robust programmes. In this regard, the University shall:

- a) Identify the stakeholders for each programme
- b) Engage in consultations with the stakeholders
- c) Identify and align the programme with the quality requirements of the stakeholders, including the standards for recognition by professional bodies, if applicable.

1.2.3 Student Centred

Students are the key stakeholders in the development and review of curricula. The process shall take cognizance of their experiences and expectations.

1.2.4 Equity and Inclusivity

Curriculum shall be designed to meet the educational needs of all students admitted to the University.

1.2.5 Diversity

Curriculum development and review shall be sensitive to the different background and outlooks of those engaged in the teaching and learning process.

1.2.6 Accountability

The academic Department in which a particular curriculum is designed, developed, revised and taught shall be accountable to the senate for adherence of this policy and the processes prescribed

1.3 Policy Rationale

The World is changing and so must education. Curricula are the heart and soul of a university. A university is as good as the programmes it offers. Universities are constantly under the challenge to develop and implement new/reviewed academic programmes that reflect and respond to the dynamics of local and global markets. The mandate of this policy is to ensure that the university curricula development and review process is standardized, meets the expectations of professional and regulatory bodies and enhances student learning, engagement, experience and outcomes.

1.4 Scope of the Policy

This policy shall apply to all academic programmes of JKUAT.

2.0 OBJECTIVES OF THE POLICY

The main objectives of this policy are to:

- a) Provide guidelines and standards for curriculum development and review as provided for by the JKUAT Statutes and the Universities Standards and Guidelines, 2014.
- b) Prescribe measures that will ensure quality in the University academic programmes.
- c) Provide structures for involvement of all stakeholders during the development and review of academic programmes.
- d) Ensure relevance and competitiveness of the University academic programmes.

3.0 EDUCATIONAL CURRICULUM

The Third Schedule of the Universities Standards and Guidelines, 2014 provides the standards to be used by Universities in Kenya in the development, implementation, quality assurance and review of academic programmes. According to the Commission, an *academic programme* means

the design of learning content, which is multi-dimensional and includes intentions, structure of content, delivery modes, academic resources and assessment modes. A programme of study means the prescribed syllabus that students must be taught at each key stage.

Learning can take place in formal or informal settings and any experience that has a formative effect on the way one thinks, feels, or acts may be considered educational. A distinction must be drawn between the ‘formal’ curriculum and the ‘informal’ curriculum, between the formal activities for which the timetable of the school allocates specific periods of teaching time and those many informal activities that go on usually on a voluntary basis, at lunch-times, after school hours, over the weekends or during holidays. These latter activities often called ‘extracurricular’ activities are suggested to be seen as separate from, as over and above the curriculum itself (A.V. Kelly). These activities can be identified with guidance and counselling, sports and games, educational and social clubs in universities. They have been found to contain much educational validity and point as any formal arrangements of the University. Thus, an educational curriculum must include the totality of the experiences the student has as a result of the provisions made.

4.0 STANDARDS AND GUIDELINES FOR AN ACADEMIC PROGRAMME

In developing and reviewing curricula, the University shall make reference to the standards and guidelines provided by the Commission for University Education (CUE) and the Inter-University Council for East Africa (IUCEA), which include but not limited to:

- a. CUE - Universities Standards and Guidelines, 2014.
- b. IUCEA - Standards, Guidelines, Processes and Procedures for the EAC Regional Programme Accreditation, 2021.
- c. CUE - Classification of Academic Programmes in Universities in Kenya – Codebook, 2025.
- d. CUE - Guidelines for Designing Curriculum for University Academic Programmes, 2023.

This is aimed at ensuring quality in university academic programme and consequently would lead to competent graduates with requisite knowledge, skills and attitudes who will be relevant in the dynamic job market.

4.1 Academic Programmes

The following are excerpts from Universities Standards and Guidelines, 2014 that will assist Departments in curriculum design, development and review.

PROG/STD/01: An academic programme shall facilitate a balanced learning process, ensuring that the students are able to acquire such cognitive, affective and psychomotor skills as are consistent with educational goals and aspirations of Kenyans.

Guidelines

The design of an academic programme shall take into account the Commission's standards and ensure that the programme:

- 1) Is relevant and contextualized;
- 2) Contributes to the overall national human resource development and requirements and higher education reforms;
- 3) Is broad-based, diversified and integrated; and
- 4) Is as much as possible practical-orientated.

PROG/STD/02: Each level of academic programme shall be differentiated by specific attributes. Higher levels of academic programmes shall require more complex attributes according to Bloom's Taxonomy.

Guidelines

1) Bachelor's Degree Programmes

a) A bachelor's academic programme shall be considered to be a foundational educational programme. The programme shall:

- i. Provide a broad knowledge base within a discipline involving critical and analytical understanding of the major theories, principles and concepts in the discipline;
- ii. Provide the learner with a comprehensive range of cognitive and analytical skills and their application to various situations;
- iii. Entail demonstration of adequate problem-solving skills; and
- iv. Enhance society consciousness and contributions to the general development of the society.

b) A bachelors' academic programme shall carry a minimum number of total instructional hours:

- | | |
|----------------------------------|--------|
| i. Applied Sciences | - 2240 |
| ii. Arts and Humanities | - 1680 |
| iii. Medical and Allied Sciences | - 3960 |
| iv. Pure and Natural Sciences | - 1785 |
| v. Social Sciences | - 1680 |

2) Postgraduate Programmes

a) A postgraduate programme shall be offered to individuals who have completed a bachelor level degree. The levels of postgraduate programmes will comprise of:

- i. Postgraduate Certificate programme
- ii. Postgraduate Diploma programme
- iii. Master's Degree programme
- iv. Doctoral Degree programme

- b) The structure of a postgraduate degree programme shall consist of various components that include taught/coursework, research and practicum. Each component of the programme shall be assessed separately;
- c) A postgraduate diploma/certificate programme shall carry a minimum of 360 instructional hours and shall extend over a period of not less than one academic year.

3) Master's Degree Programmes

- a) A master's programme shall be designed to provide additional education or training in the student's specialized branch of knowledge. It shall demonstrate mastery in a specific field of study or area of professional practice. The programme shall:
 - i. Offer highly specialized knowledge in a discipline or field of study;
 - ii. Enhance critical awareness of knowledge issues in a discipline or field of study;
 - iii. Promote specialized problem-solving skills required in research and/or innovation;
 - iv. Demonstrate mastery of a given discipline or field of study;
 - v. Entail originality and creativity in the application of knowledge, skills and practice in the field of study;
 - vi. Contribute to advanced knowledge and skills in the field of study; and
 - vii. Prepare the individual to take a significant responsibility in society.
- b) A master's degree programme shall consist of a minimum of 630 instructional hours;
- c) The structure of a master's degree programme shall demonstrate the weighting of courses in relation to coursework and thesis/dissertation;
- d) Research shall form an integral part of a master's degree programme and shall constitute not less than one third ($\frac{1}{3}$) of the entire programme structure;
- e) The length of the thesis/dissertation of a master's degree programme shall normally be at least 20,000 words.

4) Doctoral Degree Programmes

- a) A doctoral programme shall be designed to train research scholars and, in many cases, future university staff members. The programme shall:
 - i. Enhance knowledge at the most advanced frontier of the discipline or field of study;
 - ii. Provide the learner with the most advanced and specialized skills and techniques required to:
 - Solve critical problems in research and/or innovation; and
 - Extend and redefine existing knowledge.

- iii. Entail demonstration of substantial authority, innovation, autonomy, scholarly and professional integrity and sustained commitment to the development of new ideas or processes at the forefront of a discipline or field of study.
- b) A doctorate degree programme shall normally extend for at least three (3) academic years.
- c) Two kinds of doctoral level programmes exist at the same classification level, notably Doctor of Philosophy degrees programmes and professional doctoral degrees. A clear distinction shall be made between the Doctor of Philosophy degree programmes and professional doctoral degrees.
 - i. Doctor of Philosophy degree programme shall focus on producing scientist practitioners who are mainly engaged in generating knowledge through research and teaching;
 - ii. Professional doctoral degree programmes are normally practice-oriented and focus on producing practitioner scholars who are engaged mainly in consuming knowledge, practice and active research.
- d) The structure of a doctoral degree programme shall demonstrate the weighting of courses in relation to coursework and thesis/dissertation
- e) Research shall form an integral part of a doctoral programme and shall constitute not less than two thirds ($\frac{2}{3}$) of the entire programme structure;
- f) The length of the thesis/dissertation of a doctoral programme shall normally be at least 50,000 words;
- g) Before the award of a doctoral degree, a candidate shall normally show proof of acceptance for publication of at least two (2) papers in refereed journals.

5) Diploma Programmes

- a) The duration shall be:
 - i. 4 semesters for programmes in College of Human Resource Development.
 - ii. 5 semesters for programmes in the School of Computing and Information Technology.
 - iii. 7 semesters for programmes in School of Architecture and Building Sciences.
 - iv. 9 semesters for programmes in School of Medicine.
- b) Detailed programme specific requirements shall be included in the curriculum.

6) Certificate Programmes

- a) The duration shall be 2 semesters.
- b) Detailed programme specific requirements shall be included in the curriculum.

4.2 Structure of an Academic Programme

The following is an excerpt from the Universities Standards and Guidelines, 2014 that will assist Departments on the structure of an academic programme

PROG/STD/04: An academic programme structure shall be aligned to a standard format as provided for by the Commission and shall include background information of the university, information on the various programme facets and details on the academic resources for the support of the programme.

Guidelines

1) Each academic programme structure shall consist of:

a) The university's background information, which includes:

- i. The vision, mission and philosophy of the university;
- ii. The university's minimum admission requirements;
- iii. Academic resources for the support of the programme; and
- iv. Academic organization of the programmes.

b) Information on the various facets of the programme including:

- i. The title;
- ii. Philosophy;
- iii. Rationale including market survey implications;
- iv. Goal;
- v. Expected learning outcomes of both the programme and the specialization areas (if any);
- vi. Mode of delivery;
- vii. Academic regulations comprising of admission requirements, regulations on credit transfer, programme requirements, student assessment policy/criteria, grading system, examination regulations including moderation of examinations, graduation requirements, classification of degrees and regulations for thesis/dissertation/projects (where applicable);
- viii. Course evaluation;
- ix. Management and administration;
- x. List of courses/units;
- xi. Duration and structure;
- xii. Course distribution table; and
- xiii. Course descriptions for each course including, course title, purpose, expected learning outcomes, content, mode of delivery, instructional materials and/or equipment, assessment, (reference materials including textbooks, journals and e-materials).

c) Appendices of the academic resources for the support of the programme comprising of the facilities; equipment and teaching materials; core-texts and journals; academic staff; and the University Policy on Curriculum Development.

2) There shall be a linkage between the various facets of an academic programme:

- a) The institutional information shall be cascaded down to the programme, while the programme's general information shall be cascaded down to the various courses of the programme;
- b) The course title shall be reflected in the purpose of the course and the course's expected learning outcomes; and
- c) The expected learning outcomes shall be reflected in the course content, which shall be linked to the mode of delivery, instructional materials and/or equipment, assessment and reference materials

4.3 Academic Programme Title

In determining the programme title, reference shall be made to Classification of Academic Programmes in Universities in Kenya – Codebook, 2025. The classification system provides a structured and consistent method for identifying academic programmes, including name, programme level, broad field code, narrow field code, and specific programme code.

Moreover, the following excerpt from the Universities Standards and Guidelines, 2014 will assist Departments in the choice of programme titles:

PROG/STD/05: The academic programme title shall be reflective of its overall content.

Guidelines

- 1) The academic programme title shall adapt universal nomenclature for similar programmes;
- 2) The academic programme title shall be short, concise and descriptive of its overall content;
- 3) The appropriateness of an academic programme title shall be determined by:
 - a) At least 70% of the content being relevant and core to the academic programme. This includes both core and specialization courses; and
 - b) For an academic programme title that include two (2) field of study, the allocations of core courses to the two (2) fields shall be equally shared.
- 4) Two (2) or more similar academic programmes shall be considered distinct, thus warranting unique programme titles, if more than 30% of the core content is different.

4.4 Facilities and Equipment

The following excerpt from the Universities Standards and Guidelines, 2014 will guide the Department in ensuring appropriate and adequate facilities and equipment are availed for an academic programme:

PROG/STD/18: A programme shall be supported by appropriate and adequate facilities and equipment.

Guidelines

- a) The available facilities and equipment shall be up-to-date, relevant and adequate for the support of a given programme;
- b) The type of facilities and equipment required for any given programme shall be dictated by the nature of the programme;
- c) Each programme shall be supported by a minimum of two (2) lecture rooms for a four year programme; departmental offices; lecture theatres/conference rooms; and laboratory facilities (where applicable);
- d) A feasible rotational plan shall be availed for facilities and equipment that are shared among several programmes;
- e) Memoranda of Agreements shall be availed for facilities and equipment sourced from other institutions for the support of the programme; and
- f) A programme for which adequate facilities and equipment have been provided for at least the first two years of study may be considered for launching.
- g) *Additional standards and guidelines for an academic programme by the applicable professional and/or regulatory bodies shall apply.*

5.0 PROGRAMME STRUCTURE

An academic programme will equip the student with the correct cognitive skills, psychomotor skills and attitudes to realize the dream of being competent in the desired career. This section provides guidelines and standards by CUE that shall be adhered to during curriculum development and review. Basic information on infrastructure, human resource, curriculum content and teaching methods are outlined. A detailed format is provided in the Guidelines for Designing Curriculum for University Academic Programmes 2023 and the JKUAT Academic Quality Assurance Handbook.

5.1 Programme Purpose

An academic programme shall identify a gap requiring clearly identifiable human competencies in providing solutions. An academic programme shall serve as an academic bridge connecting the needs assessment and the anticipated solutions. Graduates with adequate competencies as demonstrated through appropriate knowledge, skills and attitudes will be the human resource product. These competencies inculcated in the graduates shall be the purpose of the programme.

5.2 Justification of the Programme

There must be a very clear justification for developing/reviewing a programme. The Justification must be based on:

- a) Needs assessment
- b) Stakeholders views
- c) Government blueprints
- d) Market Analysis

Relevant data and appropriate statistical analyses shall be provided to support the justification. The Department shall design appropriate questionnaires to aid data collection and identify stakeholders to whom the questionnaires will be administered. Proper data collection and analysis before curriculum development/review will lead to graduates relevant to the job market.

5.3 Academic Regulations for the Programmes

This section captures the standards, rules and regulations concerning learners to be admitted into the programme, their conduct while in the programme and subsequent graduation.

5.3.1 Admission Requirements for the Programme

This shall define the minimum qualifications that applicants shall have attained in order to qualify for admission into the programme. This must be in line with the Kenya National Qualifications Authority (KNQA), Universities Standards and Guidelines and JKUAT statutes.

5.3.2 Student Assessment

Assessment is the systematic collection and analysis of information to improve student learning. Student assessment enables instructors to measure the effectiveness of their teaching by linking student performance to specific learning objectives. As a result, teachers are able to institutionalize effective teaching choices and revise ineffective ones in their pedagogy.

Assessment shall enable the Department to determine the metrics of measurement for student understanding of and proficiency in course learning objectives. Assessment provides the evidence needed to document and validate that meaningful learning has occurred in the classroom.

All students admitted into JKUAT programmes will undergo mandatory assessment in order to determine the level of learning before graduation as approved by the University Senate. Assessment tools will include:

- a) Continues Assessment Tests (CATs)
- b) Practical/Workshops/Field attachments
- c) End of Semester/Year Examinations

5.3.3 Evaluation of Curriculum Performance

All academic programmes shall have provisions for evaluating their performance towards achieving intended objectives and purpose. As a means of enhancing efficiency and effectiveness, each Department is encouraged to design and implement evaluation kits appropriate to their niche. The University, through DQA has the following common curriculum performance evaluation methods and tools:

- a) Mid-semester student curriculum performance evaluation.
- b) End-semester student curriculum performance evaluation.
- c) Normative, Formative and Summative programme self-assessment as captured in the JKUAT Quality Assurance Handbook.

The information generated upon data analyses will inform:

- a) Whether the programme purpose is being achieved or is achievable.
- b) Whether there are adequate facilities to successfully run the programme.
- c) What measures need to be put in place to ensure successful implementation of the programme?

5.3.4 Grading System

Programme shall capture the grading system as approved by the University Senate. This is in line with the internationally approved and recognized formats. These include allocation of percentage marks and letter grades as captured in the University statutes.

5.3.5 Examination Moderation

For quality assurance, all University examinations shall be subjected to University Senate approved moderation processes as stipulated in the University Statutes and IMS procedures. All the end of semester/year written examinations shall be subjected to:

- a) Internal moderation
- b) External moderation

Both moderations and reporting will be conducted as outlined in the JKUAT Academic Quality Assurance Handbook.

5.3.6 Mode of Delivery

Curriculum delivery is a human activity system. When applied to particular curriculum framework, this systems model allows us to see what is actually being proposed and the implications. There are various modes that can be employed.

The Commission for University Education has set regulations on the mode of delivery for all approved University programmes. The following are excerpt from the Universities Standards and Guidelines, 2014 on mode of delivery:

PROG/STD/11: (1) The quality of an academic programme shall not be compromised by the mode of delivery of the programme. (2) The mode of delivery of a programme shall promote student engagement.

Guidelines

A University shall clearly articulate the mode of delivery of all its academic programmes. The mode of delivery shall include:

- 1) Face-to-Face (full-time, part-time);
- 2) Modular;
- 3) Open and distance;
- 4) E-learning modes; and
- 5) Blended

5.3.6.1 Face-to-Face Learning

All teaching and learning shall occur in a face-to-face context. Content, communication and collaborations between teachers and students, students and students shall occur on campus at set times, days and weeks, and assessment tasks shall be physically handed in.

5.3.6.2 Modular Learning

This is a system where a course is broken down into smaller independent modules, each focusing on a specific competency or skill set. Rather than enrolling in a full programme, the learner can complete one module at a time and receive a certificate for it. The learner can enter and exit the programme at different points, allowing for flexible and self-paced learning.

5.3.6.3 Open and Distance Learning (ODL)

ODL is a system wherein teachers and learners need not necessarily be present either at same place or same time and is flexible in regard to modalities and timing of teaching and learning as also the admission criteria without compromising necessary quality considerations. Open refers to a commitment that removes any unnecessary barriers to access learning. Distance education refers to teaching and learning that temporarily separates teacher and learner in time and/or place; uses multiple media for delivery of instruction; involves two-way communication and possibly occasional face-to-face meeting for tutorials and learner-learner interaction.

5.3.6.4 E-Learning

E-learning, also known as electronic learning, is an educational approach that utilizes information and communication technologies (ICT) to deliver educational content and resources via online platforms. E-learning enables students to access training materials, engage in activities, and participate in educational interactions using electronic devices such as computers, cell phones, and even Virtual Reality or Augmented Reality (VR, AR).

5.3.6.5 Blended Learning

This shall combine face-to-face elements such as classroom or laboratory sessions, with online learning elements such as narrated presentations, videos and online forums. Blended courses shall include online content/activities to support face-to-face learning, or divide learning into online components and face-to-face components.

The type of content/activities that shall be chosen and the implementation strategies shall depend on the desired learning outcomes and the most appropriate and effective blend of in-class and online elements.

Additional requirements by the applicable professional and/or regulatory bodies on programme structure and delivery shall apply.

6.0 CURRICULUM REVIEW

6.1 Aim of Curriculum Review

The aim of curriculum review is to enhance student learning, engagement, experience and outcomes. The process has the potential to improve communication and collaboration between staff, leading to a stronger programme team ethos and programme identity.

6.2 Review Cycle

Each programme shall be reviewed after every full cycle. A cycle refers to the period of time taken for a cohort of students admitted to complete the programme and graduate.

6.3 Drivers of Curriculum Review

Curriculum review may be in response to any of the following:

- a) Programme Self-Assessment Report (SAR)
- b) Changing nature of the discipline

- c) To rationalise your offering, for example by avoiding duplicate provision or reducing the assessment burden for staff and students
- d) Opportunities offered by new learning technologies
- e) Increasing cohort size
- f) Shifting student demographics
- g) Trends in student retention, progression and achievement (including attainment gaps between students from different demographic groups)
- h) Trends in student satisfaction surveys
- i) Trends in recruitment
- j) Changing expectations of professional, statutory and regulatory bodies
- k) Analysis of programme information
- l) Outcomes of cyclical quality assurance processes, such as external examiners' reports
- m) Outcomes of module and programme evaluations
- n) Original aims and outcomes of the programme having been lost through 'module drift' over time

The CUE Guidelines for Self-Assessment for Programme Quality Audit shall be used to prepare a programme Self-Assessment Report.

7.0 ROLES AND RESPONSIBILITIES

7.1 Departmental Quality Assurance Board

The Chairman of Department shall appoint a Departmental Quality Assurance Board (DQAB) chaired by him/her. The membership of DQAB shall constitute heads of thematic areas in the Department.

Roles of the Departmental Quality Assurance Board shall include:

- a) Generate normative, formative and summative self-assessment reports of all departmental academic programmes.
- b) Carry out a needs assessment of all departmental programmes.
- c) Collect and analyse stakeholders' views concerning departmental programmes.
- d) Generate a Departmental agenda on Review / development of an academic programme.

7.2 Departmental Board

Roles of the Departmental Board shall include:

- a) Adopt and discuss the Departmental Quality Assurance Board reports.
- b) Adopt and discuss Development/Review academic programme agenda developed by the

quality assurance board.

- c) Participate in Programme Development/Review.

7.3 Students, Alumni and Employers

For review of programmes, students shall be required to give views through mid and end of semester curriculum performance evaluations. In addition, Departments shall be required to prepare appropriate questionnaires to collect views from their current students, Alumni and employers of their graduates.

8.0 PROCEDURE FOR DEVELOPMENT AND REVIEW OF PROGRAMMES

It shall be the responsibility of an academic Department, with the guidance of the Chairman to ensure that curricula development and review are carried out appropriately and on schedule. To produce competitive quality programmes, the developers/reviewers will be guided by JKUAT Guidelines for Curriculum Development and Review. The following shall be adhered to:

- a) Academic programmes shall be domiciled in the academic Departments.
- b) Programme development/review shall be initiated by the Department. The Chairman of Department shall head the processes.
- c) All departmental academic staff shall participate in the programme development/review process with specific inputs in their areas of specialization.
- d) The Department shall undertake a self-assessment for the programme and hence prepare a self-assessment report (SAR) as per the Guidelines for Self-Assessment for Programme Quality Audit.
- e) The SAR shall serve as the foundational document for programme review.
- f) The new/reviewed programme shall be subjected to stakeholder engagement to ensure that their needs and concerns are addressed.
- g) A full departmental committee shall approve the new/reviewed programme before it is forwarded by the Chairman of the Department to the Dean/Director of the School/Institute.
- h) The Dean/Director shall constitute a School/Institute board to discuss the programme, give recommendations and subsequently own the programme.
- i) The Dean/Director of the School/Institute shall then forward the programme to the Principal of the College for discussion and approval by the College Management Board.
- j) The Dean/Director of the School/Institute shall then forward the programme to the Director DQA.
- k) The Director DQA will confirm whether the Programme adheres to the CUE and University rules and regulations for university academic programmes. If the programme does not meet the CUE and University rules and regulations, the Chair of Department shall be guided to

make appropriate corrections before resubmission to DQA.

- l) The Director DQA shall forward the programmes that adhere to the CUE and University rules and regulations for university academic programmes to the Deputy Vice Chancellor Academic Affairs, as the Chairman of the Deans Committee, for subsequent tabling and discussion in the Deans Committee.
- m) Upon approval by the Deans Committee, the DVC AA shall forward the Programme to the Vice Chancellor for subsequent tabling in the University Senate.
- n) Upon approval by the University Senate, the Vice Chancellor shall forward the Programme to CUE for accreditation.
- o) After CUE accreditation, the Registrar Academic affairs shall admit students as per the University Senate approved procedures.

9.0 PROGRAMME MANAGEMENT AND IMPLEMENTATION

- a) The host Department shall manage and implement the programme.
- b) An ODeL policy shall apply for ODeL programmes.
- c) Student academic progression shall be as per School/Institute regulations as approved by the University Senate.
- d) For programmes jointly run by JKUAT and other institutions, CUE guidelines and relevant collaboration agreements shall apply.
- e) Programmes adopted by JKUAT shall be run as per the standards and guidelines of the professional bodies, where applicable.

10.0 CONDUCT OF STUDENTS

- a) Students will be required to familiarize themselves with the common University rules and regulations and the rules and regulations of their respective Schools/Institutes.
- b) Students admitted in SODEL, will be required to familiarize with the rules and regulations under SODEL.

11.0 MONITORING AND EVALUATION OF TEACHING

11.1 Monitoring

This is the systematic process of collecting, analysing and using information to track a programme's progress toward reaching its objectives and to guide management decisions. Monitoring usually focuses on processes, such as when and where activities occur, who delivers them and how many people or entities they reach.

Monitoring is conducted after a programme has begun and continues throughout the programme implementation period. Monitoring is sometimes referred to as *process, performance or formative evaluation*.

11.2 Evaluation

This is the systematic assessment of an activity, project, programme, strategy, policy, topic, theme, sector, operational area or institution's performance. Evaluation focuses on expected and achieved accomplishments, examining the results chain (inputs, activities, outputs, outcomes and impacts), processes, contextual factors and causality, in order to understand achievements or the lack of achievements. Evaluation aims at determining the relevance, impact, effectiveness, efficiency and sustainability of interventions and the contributions of the intervention to the results achieved.

An evaluation should provide evidence-based information that is credible, reliable and useful. The findings, recommendations and lessons of an evaluation should be used to inform the future decision-making processes regarding the programme.

11.3 Monitoring of Teaching

The following shall apply in monitoring teaching:

- a) Class attendance of teaching staff and students will be monitored through login credentials for ODeL classes and manually for face-to-face classes.
- b) Students and lecturers shall be required to log into the online meeting/class using their official names and/or registration numbers for ODeL classes.
- c) Departmental teaching timetables will be prepared indicating time and venue for each unit.
- d) A list of registered students will be produced by the department for each unit.
- e) Lecturers will be required to host only registered bona fide students.
- f) Lecturers will generate attendance registers to ensure that only students who attain at least two-thirds class attendance are allowed to sit for examinations.

There shall be normative, formative and summative programme evaluations as outlined in JKUAT programme development and review guidelines. These shall form part of the programme Self-Assessment Report (SAR).

12.0 EXAMINATIONS

An examination is a formal test that each student shall take to show his/her knowledge or ability in a particular subject in order to obtain a qualification.

- a) Students will be assessed through written continuous assessment tests, assignments, end of semester examinations, practicals, workshops, studios, projects, attachments and clinical teachings/examinations.
- b) Students will be expected to undertake examinations as per Senate approved regulations for each school.
- c) JKUAT Common Examination Rules and Regulations (WI-2-60-1-1) shall apply.
- d) Examination will either be face-to-face or online as shall be approved by the Senate for each School.

13.0 QUALITY ASSURANCE

The Directorate of Quality Assurance shall oversee the quality assurance in all University academic programmes. This shall be based on:

- a) Universities Act No. 42 of 2012 (Revised 2024)
- b) Jomo Kenyatta University of Agriculture and Technology Charter 2013
- c) Jomo Kenyatta University of Agriculture and Technology Statutes 2014
- d) Universities Standards and Guidelines, 2014
- e) JKUAT Quality Assurance Policy.
- f) JKUAT Academic Quality Assurance Handbook
- g) Any other guidelines and standards by the CUE or University Senate with regards to quality assurance as may be determined from time to time.

14.0 PROGRAMME QUALITY AUDIT

Through the Directorate of Quality Assurance, the University shall device a Quality Management System and guidelines to audit academic programmes for purposes of quality assurance. This will be in line with the Universities Standards and Guidelines, 2014 herein quoted:

PROG/STD/20: (1) A university shall conduct self-assessment of its programmes at regular intervals. (2) Structures shall be put in place by an institution for continual assessment of its academic programmes for quality and efficiency.

Guidelines

Self-assessment of the academic programmes of a given institution shall take into consideration the:

- 1) Requirements of stakeholders and the expected learning outcomes;
- 2) Process, including the programme specification, programme content, programme organization, didactic concepts and student assessment;
- 3) Inputs, including the quality of academic and support staff, student' profile, students'

Advice/support, facilities and infrastructure;

- 4) Quality assurance, including student evaluation, curriculum design, staff development and Benchmarking;
- 5) Achievements and graduates, including graduate's profiles, pass rates and drop-out rates, Average completion time and employability of graduates;
- 6) Stakeholders' satisfaction, including opinion of students, alumni, labour market and society;
- 7) Analysis of strengths and weaknesses, including summary of strengths and weaknesses, quality action plans and implementation plan.

15.0 LIBRARY

The Fifth Schedule of the Universities Standards and Guidelines, 2014 provides the requirements for University Libraries. To facilitate students to adequately learn, the following shall apply:

- a) The University shall provide adequate resources to support both physical and ODeL Library services as per 5th Schedule of the Universities Standards and Guidelines, 2014.
- b) JKUAT, Juja Main Campus shall be the Library administrative hub of the University.
- c) All University campus libraries shall have facilities and services comparable to those at the Juja Main Campus to bring Library services closer to the students.
- d) The University shall enter into collaborative arrangements for delivery of open, distance and e-learning.
- e) The University shall acquire software to enable remote access to library resources, and shall subscribe to renowned publishers for online provision of e-books and journals.
- f) The Chief University Librarian will advise the University Senate on how to keep abreast with quality Library service from time to time.
- g) *Additional library requirements by applicable professional and/or regulatory bodies shall apply.*

16.0 PHYSICAL FACILITIES

Each Department shall ensure adequacy of physical facilities as per the Second Schedule of the Universities Standards and Guidelines (2014) before making a request to the University Senate to launch an academic programme. Some of the general standard guidelines on physical facilities are hereby quoted from the Universities Standards and Guidelines (2014).

16.1 Lecture Rooms and Offices

PHYL/STD/14: A university shall provide lecture rooms which are adequate in number and size and are well-lit and ventilated.

Guidelines

1) In establishing the adequacy of lecture rooms, the minimum floor area per student specified in Table 1 shall be provided.

Table 1: Minimum lecture room floor area per student.

<i>No. of Students</i>	<i>Space in m² with desk and chair</i>	<i>Space in m² with chairs only</i>
0-29	1.9	1.9
30-39	1.9	1.4
40-59	1.7	1.3
60-99	1.7	1.2
100-149	1.7	1.0
150-299	1.5	0.9

2) The total usable space provided for lecture rooms shall be at the minimum rate of 0.65 square metres per full time students equivalent;

3) A university shall provide a minimum of two lecture rooms to each three-year course of study;

4) Every room used as a lecture room shall be of sound construction;

5) Every room used as a lecture room shall:

a) Be provided with windows with an effective area of not be less than 20 per cent of the floor area of the room and 75 per cent of the window area openable to the external air;

b) Not have a height of less than 2.60 metre from floor to ceiling, or where there is no ceiling to the wall plate; and

c) Be provided with adequate, well illuminated writing surface at each seat and a place to set books and papers.

PHYL/STD/15: A university shall provide adequate space to accommodate academic and non-academic staff offices and seminar rooms.

Guidelines

1) The total usable space provided for use as departmental areas shall be not less than those specified in the following Table 2;

Table 2: Minimum department's usable areas per FTSE

<i>Course</i>	<i>Usable space in m² per FTSE</i>
Arts and Humanities based programmes	2.8
Biological and Physical Sciences based programmes	9.0
Human and Veterinary Medicine and related programmes	15

Engineering, Surveying and related programmes	10
Architecture, Planning, Building Technology, Design and related programmes	10
Social Science based courses	2.8

2) The departmental offices shall comprise of the following minimum number of offices;

- a) One departmental office;
- b) One Head of Department office;
- c) One secretary's office;
- d) One general office for a staff secretary;
- e) One office for every two (2) members of academic staff.

16.2 Teaching Laboratories, Workshops and Studios

PHYL/STD/17: A university conducting courses of programmes requiring the use of laboratories or specialized facilities as part of instructional facilities shall, in addition to providing lecture rooms and lecture theatres provide adequate laboratory facilities.

Guidelines

- 1) Laboratory facilities should be adequate and in close proximity to lecture room or teaching facilities for ease of access;
- 2) Laboratories or specialized facilities should have room for instructional workstations and each Workstation per student should, where possible adhere to the specifications contained in Table 3.

Table 3: Laboratory assignable space per FTSE

<i>Type of Laboratory</i>	<i>Specialty Assignable space per FTSE in m²</i>
Agriculture Science Laboratory	2.80 - 3.70
Building Science Laboratory	3.70 - 4.60
Biological Health and Veterinary Science Laboratory	2.70 - 4.60
Business Management Laboratory	1.90 - 2.80
Communication Laboratory	2.40 - 3.70
Education Laboratory	2.40 - 4.60
Engineering Laboratory (excluding Mechanical)	3.70 - 6.50
Engineering Laboratory (Mechanical)	6.50 - 9.30
Fine Arts, Architecture and Design Studio	2.80 - 4.60
Nutrition and Dietetics Laboratory	2.80 - 4.60

- 3) Every laboratory shall have provision of storage and preparatory rooms in addition to a laboratory office;
- 4) A laboratory shall be provided with the following service facilities –
 - a) Adequate windows which open to outside air in order to provide proper ventilation;
 - b) Fume cupboards and fume hoods in the preparation and storage rooms;
 - c) Standard table top electrical service outlets for the instructor's table and for each pair of student's workstation;
 - d) Adequate lighting free of glare from exterior sunlight,
 - e) Surface treatment of floors, walls and ceiling to reduce noise;
 - f) A sink with hot and cold-water service installation for the instructor's table and for each pair of student's workstation;
 - g) Gas for the instructor's table and for each pair of students' workstation.
- 5) A laboratory shall have built-in furniture and equipment and equipment including
 - a) At least one student table of minimum dimensions of 2000 x 300 x 760 mm,
 - b) At least one student table of minimum dimensions of 1500 x 560 x 760 mm for each pair of student's workstation with adequate bench or stools or chairs;
 - c) Chalkboard or tack board, wall mounted; and
 - d) At least one corrosion resistant sink and eyewash fountain.

16.3 Teaching Hospitals

The University shall develop Memorandum of Understanding with Hospitals offering practical sessions to the learners.

PHYL/STD/18: A university offering medical and allied programmes shall have the necessary basic preclinical sciences together with the general requirements for laboratories and any additional provisions for specialized areas.

Guidelines

- 1) The university shall provide facilities for anatomy and pathology;
- 2) There shall be a secure access to a teaching hospital easily accessible to students and equipped with the usual outpatient and inpatient facilities covering all specializations in medicine, surgery, obstetrics and gynaecology, paediatrics, community health, as well as support facilities such as X-ray, radio-therapy, anaesthetics and pathology;
- 3) Where the hospital is not the property of the relevant university, adequate legal and administration arrangements shall be made in respect of unhindered access;
- 4) The hospital shall have the necessary resources (human, physical, technical and financial) to meet professional and academic requirements;

5) The design of the teaching hospital shall conform to the requirements of the Ministry of Health in providing relevant health services, and in addition, the hospital buildings shall conform to the requirements for building under Group II of the Sixth Schedule of the Building Code of the Republic of Kenya.

The standards PHYL/STD/20, PHYL/STD/21, PHYL/STD/22, PHYL/STD/23, PHYL/STD/24, PHYL/STD/25, PHYL/STD/26 and PHYL/STD/27 of the Commission for University Education Universities Standards and Guidelines, 2014 shall be read together with guidelines from the professional bodies where applicable

PHYL/STD/20: A university offering Urban and Regional Planning and related programmes shall have adequate studio space for every year of study and a model making workshop.

PHYL/STD/21: A university offering Building, Building Technology and related programmes shall have studio space for every year of study.

Guideline

- 1) For every year of study, the university shall have workshops for carpentry, joinery, mechanical works, welding, masonry, concrete works and electrical wiring and building services;
- 2) The university shall have laboratory space for each course of study for materials sciences, structures and services; and
- 3) The university shall provide spaces for demonstration units in various building construction techniques.

PHYL/STD/22: A university offering Architecture, Built Environment and related programmes shall have design studios for each class with adequate individual workspace.

Guidelines

- 1) The workspace at the design studios shall be at the rate of 2.5 square meters per work station;
- 2) A modelling workshop with equipment enough for at least two class years shall be provided in addition to one material and testing workshop and one wood workshop;
- 3) The university shall also provide sufficiently equipped architectural, science and photography laboratories; and
- 4) Spaces within the overall premises of the department for external activities such as those required for workshops fabrication and for erection of building components and for testing their exposure of weather activities shall be provided.

PHYL/STD/23: A university offering Nutrition and Dietetics, and related programmes shall have laboratories with adequate installation for instructions in food preparation, cooking and services using a variety of cooking energy sources; electricity, gas and wood.

Guidelines

The laboratories shall have the following spaces.

- 1) Food analysis to the extent of 5 square meters per student workstation;
- 2) Food storage and preparation to the extent of 1.5 square meters per student workstation;
- 3) Sewing and crafts to the extent of 4 square meters per student workstation;
- 4) Sewing and craft storage and dressing to the extent of one square meter per student workstation;
- 5) Child development with its own storage room, office, opens play, cleaning up and observation rooms; and
- 6) Home care laboratories shall also be equipped with laundry and ironing facilities.

PHYL/STD/24: A university offering Communication and related programmes shall have studios with adequate space for broadcast, television and radio production for every year of study.

Guidelines

- 1) For every year of study, laboratories for creative multimedia; animation, modelling and imaging, video and motion-graphics, interactive web design, audio editing/mixer, print editing and cinema improvised - dark room and personal computers;
- 2) Further, the university shall have adequate space for journalism for reporting, research writing and production of news;
- 3) Adequate lecture rooms for all the units offered; and
- 4) Space required to accommodate the above rooms shall not be less than 420 m² for 150 students (i.e. 2.8 m² per student).

PHYL/STD/25: A university offering Telecommunication Engineering and related programmes shall have laboratories with adequate space for digital and analogue communication, electromagnetic engineering, control and fibre – optics.

Guidelines

The university shall have for every year of study:

- 1) Anechoic chamber, servers and workstations;
- 2) State-of-the-art facility for wireless sensor networks, network security, mobile networking, data packet routers, voice over IP gears with software switch, media server, trunk gateway, IP phone;
- 3) Equipment, such as, microwave trainer, antenna trainer, network analysers, signal generators, digital oscilloscopes and tools;

- 4) Lecture rooms and lecture theatres equipped with visual aids.
- 5) Adequate space that is required for all the activities is approximately 630 m² for 160 students, i.e. 3.9375 m² per student.

PHYL/STD/26: A university offering Agriculture and related programmes shall, in addition to the laboratory specification shall have at least ten hectares of land set aside as a university farm over and above that stipulated for an ordinary university.

PHYL/STD/27: A university offering Information and Communication Technology and Computer Studies and related programmes shall provide adequate and well-equipped laboratories for the specializations they offer.

Guidelines

- 1) The institution shall provide such number of computer laboratories equipped with such number of computers as to ensure an access level of one computer per student at all times when teaching and learning requires access to a computer;
- 2) The institution shall provide an adequately equipped computer workshop;
- 3) The institution shall maintain an internet connectivity of a bandwidth adequate for the type of programmes it is offering; and
- 4) The institution shall provide at least one general computer laboratory.

16.4 Open, Distance and E-Learning

The Fourth Schedule of the Universities Standards and Guidelines 2014 provides the requirements for Open, Distance and E-Learning (ODEL), which shall apply. The scope of the standards includes open, distance and e-learning offered by universities through the following modes:

- 1) Traditional distance education
- 2) E-learning provision and interactive CD ROMs
- 3) Blended learning
- 4) Virtual education

Additional requirements by applicable professional and/or regulatory bodies regarding physical facilities for the programme shall apply.

17.0 ACADEMIC AND NON-ACADEMIC STAFF

Before developing any academic programme, the Department concerned shall ensure that they have adequate non-academic and academic staff as per the Universities Standards and Guidelines here quoted:

INST/STD/04: A university shall have adequate and competent human resources to carry out its mandate in accordance to its human resource policy.

Guidelines

- 1) The teaching staff of a university shall meet the qualifications outlined in the Standards for Academic Programmes as provided for in the Third Schedule;
- 2) Every university should clearly articulate its appointment criteria as stipulated in this standard.

PROG/STD/17: (1) An academic programme shall be supported by adequate full-time staff holding requisite academic qualifications. (2) A programme shall be guided by appropriately qualified academic leader. (3) A university shall provide evidence of the qualifications and appointments of its staff.

Guidelines

- 1) Each academic programme shall be headed by a full-time appropriate and qualified Senior Lecturer and above with at least five (5) years university teaching experience, who has a doctorate degree in the relevant field of study;
- 2) Each academic programme shall be supported by at least two (2) other appropriate full-time academic staff members;
- 3) The ratio for full-time to part-time academic staff members for the support of any given programme shall be 2:1;
- 4) The minimum academic qualifications of academic staff for a given level of academic programme shall be at least one level above what he or she is supposed to teach as provided:
 - a) Bachelors' level
Relevant masters-level degree.
 - b) Masters level
Relevant doctoral degree, with at least three (3) years of teaching experience and evidence of research inclination through individual research, supervision of research and theses and involvement in peer reviewed publications;
 - c) Doctorate
Relevant Doctorate degree, with at least five (5) years of teaching experience, and evidence of research inclinations through individual research, supervision of research and theses and involvement in peer reviewed publications.
- 5) The recommended full-time staff: student ratio is:
 - a) Applied Sciences - 1:10
 - b) Arts and Humanities - 1:15
 - c) Medical and Allied Sciences - 1:7
 - d) Pure and Natural Sciences - 1:10

e) Social Sciences - 1:18

6) An academic staff shall be assigned students to supervise on thesis/dissertation based on a combination of his/her teaching load, administrative duties, and supervision experience and capacity. The maximum number of students an academic staff shall supervise in any given academic year shall be:

a) Masters - 5

b) Doctorate - 3

7) The maximum lecturer workload shall be 40 hours per week and shall include teaching; preparation of examination papers; marking of examination scripts; tutorials; preparation of teaching; supervision of academic work; administrative work; laboratory and laboratory preparation; and research/research assignments.

Additional requirements by applicable professional and/or regulatory bodies regarding the human resource for the programme shall apply.

18.0 OWNERSHIP

a) All Programmes shall be the property of the University.

b) All programmes shall be domiciled and hosted in the appropriate Department as approved by the University Senate.

19.0 FEES

The fees payable shall be as per the applicable Fees Structures and paid as per the University Fees Payment Policy. Schools shall advise the University Management on the fees to be paid.

20.0 TEACH-OUT PLAN

If and when a programme has to be discontinued or phased out, the University shall put in place a detailed and well-documented teach-out plan, that shall be in conformity with applicable regulatory requirements, to ensure that the students who are currently enrolled in the programme complete their study or transition to another programme without disadvantage.

21.0 EFFECTIVE DATE AND REVIEW DATE

a) This policy shall be effective from the date of approval or one designated by the University Council and remain in force for a period of five years or until it is amended or repealed by the University Council.

b) This policy shall be reviewed from time to time to reflect global and local changes in law, policies, best practices and trends in curriculum development and review.
